Assignment 1

February 23rd, 2026

- Demonstrating this performing inference on the new topics
  - I'm not exactly sure what you mean by this? I created a new reservation topic and an email was correctly categorized on the last page of this document.

- Demonstrate this adding new emails

POST /api/v1/topics Create Topic

Parameters

No parameters

Request body required

```
{
  "topic": "Reservations",
  "description": "Personal reservations"
}
```

Execute

Responses

Curl
